

# Eemits kits out Furzefield Leisure Centre with new Hytera BP565 two-way radio solution

PUBLIC SECTOR

Furzefield Leisure Centre in Potters Bar, Herts were looking for new radios to use on site. Ones that would co-exist with radios they were already using across the facility.

## THE CHALLENGE

Furzefield Leisure Centre is managed by InspireAll, who maintain and run facilities in partnership with Hertsmere Borough Council.

The challenge was to add new radios to their existing fleet of radios to give teams across the facility the right communication tools to aid worker safety, productivity, and efficiency.

They needed a screened radio to make it easier to group channels by team and enable one-to-one and group calls.

They required a solution that was cost-effective but provided them with reliable coverage, robust usage, and the ability to programme channels by team.

**TRBOCALL – GREATER THAN  
THE SUM OF ITS PARTS**

# THE SOLUTION

We installed Eemits ultra-smart digital two-way radio solution - TRBOCALL – a modular platform comprising the following:

## HARDWARE

Furzefield Leisure Centre chose 15:

Hytera BP565 radios

## The Benefits:

Furzefield Leisure Centre chose the Hytera BP565 to use across their facility.

The Hytera BP565 two-way radio is a licenced radio device, and has the following features:

**Half-keypad functionality:** With a colour touchscreen display, the leisure centre is able to programme their channels for use by different teams. This helps to make conversations more streamlined and efficient - avoiding the likelihood of unnecessary disruption and interference.

The integrated call buttons also make it easier to make one-to-one calls. End users can scroll through a contact list to pinpoint exactly who they wish to contact.

**Impressive audio:** The BP565 has built-in noise reducing technology to eliminate background noise and feedback. The 3W high power loudspeaker is perfect in and around facilities where physical activity is taking place.

**Expanded coverage:** An innovative monopole antenna enhances signal penetration. This increases communication distance by up to 11% in weak signal areas.

**IP67 rating:** The BP565 is IP67-rated, meaning it is water-resistant up to a depth of three feet for up to 30 minutes, and has a strong protection against dust.

**Free programming:** As the centre has opted for licenced radios, we've provided them with free programming. This includes cloning their new radios to their existing fleet (including OFCOM licences).

# THE RESULTS

Furzefield Leisure Centre now have new radios that give them the ability to make one-to-one and group calls.

The radios also give them reliable coverage and robust protection against water, dust, and being dropped.

And by using licenced radio devices, they receive free programming, where we sync their new radios up to existing devices (including frequencies).

Eemits innovative modular platform TRBOCALL - a unique combination of hardware, bespoke software applications and digital features - together create an ultra-smart two-way radio system. Combined with unrivalled wide area network coverage, our customers have the flexibility to build their own system with all, or a combination of infrastructure, hardware, software service wrap, features and accessories that suite their individual business needs.
